## You cannot participate in the trial if:

- You are pregnant
- Have a history of SARS, MERS infection
- Had fever, dry cough, fatigue, nasal obstruction or runny nose within 14 days before vaccination
- Have known allergic reactions to medicines
- Have a personal or family history of convulsion or epilepsy
- Have uncontrollable diabetes, any acute or chronic disease conditions like asthma, severe cardiovascular diseases, liver and kidney diseases, and malignant tumors
- Currently receiving any immunotherapy
- Received blood within 3 months before the vaccination

## Locations for vaccine trials

A purpose-built walk-in facility has been built at the Abu Dhabi National Exhibition Centre [ADNEC] for volunteer registration, medical screening, testing and vaccine administration. Similar facilities will be announced across the UAE shortly.

After the 49<sup>th</sup> day, you will be contacted by your physician for a telephonic check-up once to twice monthly and physical check-up once every 3 months.

## TAKE PART AND SUPPORT THE GLOBAL COMMUNITY IN ITS FIGHT AGAINST THE COVID-19 PANDEMIC

#4Humanity

Inspired by the UAE Leadership's vision and commitment to overcome the pandemic through a global collaborative effort, a clinical cooperation agreement was signed between the Chinese pharmaceutical giant Sinopharm (CNBG) and G42 Healthcare, a subsidiary of Abu Dhabi-based technology company Group 42 (G42). G42 Healthcare will lead the Phase III clinical trial of COVID-19 inactivated vaccine in the UAE, engaging up to 15,000 volunteers. The trials are developed in coordination with Abu Dhabi Health Services (SEHA), under the administration of UAE Ministry of Health and Prevention (MOHAP) and the Department of Health Abu Dhabi (DOH).

### FREQUENTLY ASKED QUESTIONS

#### Are there related risks?

Some common reactions may occur when receiving this vaccine, including mild pain, redness, induration, and pruritus at the vaccination site.

The volunteer may present mild systemic reactions such as fever, headache, fatigue, nausea, vomiting, diarrhea, cough, allergy, muscle pain, arthralgia, lethargy, etc.

Usually these symptoms are mild and subside on their own. Patients with moderate to severe symptoms will be treated under the supervision of their treating physician and site principal investigator.

#### Who do I call if I experience any symptoms?

Any symptom should be reported to the site principal investigator within 24 hours by visiting the healthcare clinic or calling on customer care at [02-8191112](tel:02-8191112)

#### Do you have a Recognition Program for volunteers?

Your contribution to this scientific study will help fight and prevent the COVID-19 pandemic and save precious human lives all around the world.

As a small token of appreciation for taking part in this trial, you will receive 1000 AED worth of vouchers and other giveaways throughout the program.

#### How long will I be required to participate in the study?

The duration of physical participation is approximately 2 months and the follow-up period might last up to 12 months.

#### Will my data privacy be respected?

The data of participants will be kept confidential at the healthcare facility and identification and personal details will not be shared with any entities.

The results of this study may be published in scientific journals, but no personal identity information is included.

#### Can I withdraw in the middle of a research study?

You are free to opt out at any time. Whatever your decision, you will not bear any responsibility arising from the withdrawal.

This will not affect you personally in any shape or form and will not affect any existing medical treatment that you are undergoing.

Every volunteer will receive a recognition letter.
